HEALTH

COMPREHENSIVE
FORMULA

EASY
TO USE

KEY BENEFITS

For all conditions where a higher level of Zinc is required

BASF
The Chemical Company

A balanced formulation of minerals supplying seasonally optimum levels of zinc. Formulated to also supply a balance of other minerals normally depleted over the summer season. Contains Seaweed Concentrate for mitigation of heat stress and grass staggers.

● Genuine high quality German BASF mineral chelates used.

● **BETTER ANIMAL HEALTH**

● **COMPREHENSIVE FORMULA** – Supplies all essential trace elements normally depleted over the summer period.

● **EASY TO USE** – A highly soluble mineral blend supplying 8 essential trace elements that can be drenched or dispensed via a mixer wagon.

TECHNICAL INFORMATION

DOSAGE

Dose rate 3.5 grams per 100 kgs of bodyweight.

Stock should not be dosed continuously at maximum rates for more than 100 days.

DOSAGE METHODS

Drench gun

Mixer wagon

*ACVM Registration No: A000944

DAIRY COW TRACE ELEMENT BLEND

| Element | Elemental levels based on 16 gram dose rate | Form (in the form of) |
|---------------------|---|---------------------------------|
| Zinc | 10150Mg | Zinc Oxide* |
| Copper | 150Mg | Copper Glycinate (BASF) |
| Chromium | 5mg | Chromium Glycinate |
| Seaweed Concentrate | 1000Mg | Ascophyllum Nodosum |
| Cobalt | 10Mg | Cobalt Sulphate Heptahydrate |
| Iodine | 10Mg | Ethylene Diamine Diahdro Iodide |
| Selenium | 4Mg | Sodium Selenate |
| Boron | 60Mg | DiaSodium Octaborate |

DOSE REQUIREMENTS FOR SOLUTRACE FE DRENCH

| Class of cattle | Liveweight | Dose Rate | Doses/bag | Cents/Dose |
|-----------------------|------------|-----------|-----------|------------|
| Friesian Cow | 500kg | 16g | 1562 | 14 |
| Friesian/Jersey cross | 400kg | 13g | 1923 | 11.5 |
| Jersey Cow | 350kg | 12g | 2083 | 10.5 |
| Friesian yearling | 260kg | 10g | 2500 | 8.8 |

Recommended Dose Rate: 3.5 grams per 100 kgs liveweight
