

FE Drench

SOLUTRACE

Technology in Balance

Advantages

**SUPERIOR
ANIMAL
HEALTH**

**OPTIMISED
FOR SUMMER**

**COMPREHENSIVE
FORMULA**

**EASY
TO USE**

**CONTAINS
SEAWEED
EXTRACT**

For all conditions where a higher level of Zinc is required.
Designed specifically as a drench formulation.

A balanced formulation of minerals supplying seasonally optimum levels of zinc. FE Drench can be used as a drench or mixed into feed. Contains seaweed concentrate for mitigation of heat stress and grass staggers, plus KemTRACE Chromium for optimal energy use.

FEATURES

- **Comprehensive Formula** - supplies all essential trace elements normally depleted over the summer period
- **Organic Copper** - ensures maximum copper uptake without affecting the uptake of zinc, or the health of the liver
- **Concentrated seaweed extract** - seaweed has the ability to bind with toxins reducing the effect of naturally occurring toxins in pasture
- **Easy to use** - a highly soluble mineral blend that can be dosed directly via a drench gun or mixer wagon.
- **KemTRACE Chromium Propionate** - highly bioavailable, organic source of chromium

BENEFITS

- Part of your Facial Eczema prevention plan. Seasonally optimal levels of Zinc, in an easy to use drench formulation.
- Minimise mineral deficiency. Maintain balanced nutrition with a complete mineral blend optimised for warmer months.
- Scientific Trials show KemTRACE Chromium effectiveness against heat stress, plus production benefits.

TECHNICAL INFORMATION

Daily Dose Rate

Dose rate 3.5 grams per 100 kgs of bodyweight.

Stock should not be dosed continuously at maximum rates for more than 100 days.

Dosage Methods

Drench gun

Mixer wagon

*ACVM Registration No: A006944

DAIRY COW TRACE ELEMENT BLEND

Elemental levels

based on 17.5 gram dose rate

Form (in the form of)

Element	Elemental levels based on 17.5 gram dose rate	Form (in the form of)
Zinc	10150mg	Zinc Oxide*
Copper	150mg	Copper Glycinate (BASF)
Chromium	8mg	Chromium Propionate (Kemin)
Seaweed Concentrate	1000mg	Ascophyllum Nodosum
Cobalt	10mg	Cobalt Sulphate Heptahydrate
Iodine	10mg	Ethylene Diamine Dihydro Iodide
Selenium	4mg	Sodium Selenate
Boron	60mg	DiaSodium Octaborate
Net Bag Weight	20kg

ALL MINERAL LEVELS CAN BE CUSTOM BLENDED TO HERD REQUIREMENTS.

A balanced blend of trace elements designed to deliver optimal levels of zinc during the summer period.

100% of the copper supplied in this product is in an organic complex form, ensuring maximum copper uptake without effecting the uptake of zinc or the health of the liver.

Supplies concentrated seaweed extract in a water soluble form. Seaweed has the ability to bind with toxins reducing the effect of natural occurring toxins in pasture, that may cause heat stress and problems with the central nervous system. All other minerals are supplied at optimum seasonal levels.

Each bag of product is pre-blended, dried and ground to a consistent particle size.

Recommended Dose Rate: 3.5 grams per 100 kgs of liveweight

DOSE REQUIREMENTS FOR SOLUTRACE FE DRENCH

Class of cattle	Liveweight	Dose rate/grams	Doses per bag
Friesian Cow	500kg	17.5	1143
Friesian/Jersey cross	400kg	14	1428
Jersey Cow	350kg	12.25	1633
Friesian yearling	260kg	9.1	2198
